Secure download and offline playback

Intertrust ExpressPlay® DRM Offline™

ExpressPlay DRM Offline is a multi-DRM platform that features the studio trusted Marlin DRM along with Google Widevine Modular and Apple FairPlay Streaming. It is designed to secure content delivery and playback in offline environments. When combined with the Kiora content delivery platform and premium programming from Filmbankmedia, it enables a turn-key solution for premium entertainment.

Key features and advantages:

- Offline multi-DRM solution
    - Marlin DRM plus Google Widevine and Apple FairPlay DRMs

- Secure content delivery with download and offline playback options
    - Ideal for travel and hospitality applications with limited internet access

- Hotspot approach
    - No internet connection available within the closed environment

- Gateway approach
    - Internet connection available through a dedicated proxy to operator-specific service

- Compatible with Intertrust's Kiora content delivery platform
    - Enables turnkey end-to-end solution for premium entertainment
